University of Missouri System Undergraduate Financial Aid Summary Report FY2009-FY2013

(Metropolitan Fee Undergraduates)

Executive Summary

The *Undergraduate Financial Aid Summary Report for Metropolitan Fee Undergraduates* includes undergraduate financial aid distribution patterns for the University of Missouri System and the Kansas City and St. Louis campuses from fiscal year 2008-09 (FY09) through fiscal year 2012-13 (FY13). In the first part of this report nine questions are addressed at the UM System level:

- 1. How many students received aid and what type of aid was received?
- 2. Has grant aid kept pace with increases in tuition and required fees?
- 3. How has the distribution of institutional gift aid changed over the past five years?
- 4. How has the distribution of PLUS loans changed over the past five years?
- 5. What percent of tuition and required fees is met by grant aid?
- 6. How has the number of aid recipients with need changed by income level?
- 7. How do financial aid packages vary by income level?
- 8. For students that have need, what is the average amount of unmet financial need?
- 9. Can families afford to pay the expected family contribution?

The second part of the report provides campus-level financial aid distribution patterns for the past five years, which may differ from system-level findings.

System-wide trends highlighted include:

- Total aid to students with need is awarded from a combination of aid based on merit and aid based on need. Over the past five years, there has been a 32.8% increase in the number of metropolitan fee financial aid recipients that have financial need. There is no question that there are many more students with need due to the 22.7% increase in the enrollment of full-time, degree-seeking metropolitan fee students over the past five years (Figure 1.1). However, an equally significant reason for the increase in students with need is the fact that tuition and required fees have increased 10.3% during the same time period (Figure 1.2). In other words, many students that otherwise would not have had a financial need became needy.
- There gap between tuition and required fees and the average grant aid awarded to undergraduates remained relatively unchanged over the past five years (Figure 1.2).
- The number of institutional grants awarded to metropolitan fee students based on need increased from 346 in FY09 to 421 in FY13. During the same time period

there has been a substantial increase in the number of merit awards given to students both with and without need (Table 1.1).

- Metropolitan fee undergraduate students in the lower income categories have the highest grant aid as a percentage of tuition and required fees (Table 1.2).
- The volume of Parent Loans for Undergraduate Students (PLUS loans) increased from FY09 to FY13 for both students with and without financial need.
- Students with incomes less than \$40,000 have the highest amount of financial need and receive larger total financial aid awards than higher income students. However, lower income students continue to have the largest amount of unmet financial need (Figure 1.4).
- The unmet financial need of students increased in all income levels over the past five years (Figure 1.5).

Campus-specific variations from System trends:

- Since FY09 the St. Louis campus experienced an overall decline in the total number of metropolitan fee undergraduate students and this decline has led to a decrease in the number of students with financial need (Figure 3.1).
- The gap between average grant aid and tuition and required fees decreased slightly for metropolitan fee students at the St. Louis campus (Figure 3.2).

The contextual basis of financial aid distribution

Less than 20% of undergraduates attending the University of Missouri pay the entire cost of attendance out-of-pocket. The majority of students receive some type of financial assistance to attend the University in the form of grants, scholarships, work study or loans. In addition, financial assistance comes from a wide variety of sources including the state and federal governments, profit and non-profit organizations, and the University (institutional gift aid). In addition, a significant amount of financial aid that is distributed is based on financial need (i.e. it is documented that the student's family cannot afford the entire cost of attendance). A student must complete a Free Application for Federal Student Aid (FAFSA) in order to determine the extent of financial need and the type and amount of aid based on need that can be awarded.

Many of the tables and figures throughout this report reference terms such as budgeted cost of attendance, financial need, grant aid, and unmet need. Assuming that a student has completed a FAFSA, Figure A.1 is provided to give an overview of how a student's financial aid package is determined.

Figure A.1
Example of How Financial Need is Determined and Aid is Distributed

\$23,765	Budgeted Cost of Attendance	includes tuition & required fees, books, and living expenses
(4,881)	Less: Expected Family Contrib	pution
18,884	Financial Need	
<u>(3,417)</u> 15,467		es need and non-need based grant aid from federal, state, ional, and other sources
(11)	Less: College Work Study	
(3,268)	Less: Need-Based Loans	
(1,031)	Less: Non-Need Based Loans	
\$11,157	Unmet Need	

Foremost, a BUDGETED COST OF ATTENDANCE (COA) is determined for every student that completes a FAFSA. The COA varies by student and is based on factors such as residency status, load status (full or part-time), and living arrangements (on or off-campus). Next the amount that the family is expected to contribute to cover the COA is determined based on several factors, including the family's adjusted gross income. A student's financial need is determined by subtracting the EXPECTED FAMILY CONTRIBUTION from the budgeted COA. If the calculated value of FINANCIAL NEED is positive, the student is eligible to receive need-based assistance such as pell grants, college work study and need based loans. A student's REMAINING NEED is determined after subtracting GRANT AID (aid that does not have to be repaid) from the FINANCIAL NEED. After subtracting the remaining sources of financial aid (i.e. work study, need-based loans, and alternative loans), an UNMET NEED value is determined, which is the remaining amount of money a student needs to meet the COA after all financial assistance has been provided.

Caveats

Although Figure A.1 provides a good example of how financial aid packages are determined for students, a few caveats are worth mentioning:

- 1. The unmet need value is based on all of the financial aid that a student ACCEPTED which does not always equal the amount of aid a student was OFFERED. For example, a student might decline a need-based loan or alternative loan which would have covered the student's remaining cost of attendance. That student would have unmet financial need even though ample aid was offered to meet the budgeted COA.
- 2. A student's financial need might change during the academic year based on changes to the student's budgeted COA. For example, a student might live on-campus the first semester and decide to live off-campus the next semester.
- 3. Many students take part-time jobs to meet the COA. However, the compensation received from part-time jobs (other than college work study) is not documented and does not count towards meeting the COA. In essence, many students work to meet the COA and for these students the true unmet need is unknown.
- 4. Many families borrow the "expected family contribution" and the amount borrowed is not factored into the total financial aid package, i.e. it is not counted as financial aid. Therefore, in many cases, the true financial need of a student is underestimated.

Section I

System-wide Financial Aid Trends of Full-Time, Degree-Seeking Metropolitan Fee Undergraduates from FY09 to FY13

PLEASE NOTE: The findings below highlight system-wide trends at the University of Missouri. Financial aid trends may differ by campus and are included in the second part of this report.

1. How many students received aid and what type of aid was received?

The total number of full-time, degree-seeking metropolitan fee undergraduates steadily increased over the past five years from 1,205 to 1,479, an increase of nearly 23%. With this increase in enrollment, there has been a 33% increase in the number of students with financial need from 719 in FY09 to 955 in FY13 (Figure 1.1).

2. Has grant aid kept pace with increases in tuition and required fees?

Over the past five years tuition and required fees increased 10.3% and the budgeted cost of attendance increased 0.6% while average grant aid increased 27%. Overall the gap between tuition and required fees and the average grant aid awarded to metropolitan fee undergraduates remained relatively the same from FY09 to FY13 (Figure 1.2).

3. How has the distribution of institutional gift aid changed over the past five years?

The average institutional grant awarded to metropolitan students with need increased nearly \$126 over the past five years (Table 1.1).

4. How has the distribution of PLUS loans changed over the past five years?

The volume of Parent Loans for Undergraduate Students (PLUS loans) increased from FY09 to FY13 for both students with and without financial need. In FY09 nearly 46 parents of metropolitan fee students borrowed on average \$10,688 to meet their child's education expenses. Five years later, nearly 72 parents borrowed approximately \$9,756 to cover these expenses (Table 1.4).

5. What percent of tuition and required fees is met by grant aid?

Lower income students have the most financial need and on average receive much more grant aid than higher income students. In FY09, grant aid covered nearly 52% of tuition and required fees for students with income less than \$20,000 and 50% for students with income between \$20,000 and \$40,000. By FY13, grant aid covered 58% of tuition and required fees for students with income less than \$20,000 and 50% for students with income between \$20,000 and \$40,000 (Table 1.2).

6. How has the number of aid recipients with need changed by income level?

There has been a change in the number of aid recipients with need by income level. The number of aid recipients with need with income less than \$20,000 increased by 61% from FY09 to FY13. In addition, there has been a significant increase in the number of aid recipients with need and incomes over \$60,000. Overall, the University continues to experience an increase in the number of higher-income students that require financial assistance to meet the cost of attendance (Figure 1.3).

7. How do financial aid packages vary by income level?

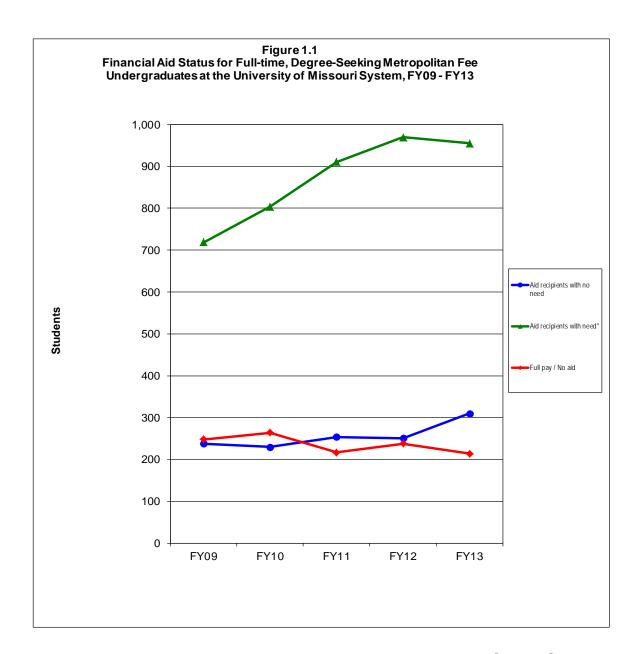

Students with incomes less than \$40,000 have the highest amount of financial need and receive larger total financial aid awards than higher income students. However, by income level, there is a difference in the structure of the financial aid packages and the way that financial need is met. For example, loans cover a larger percent cost of attendance for lower income students than higher income students. Also, even though lower-income students receive the most grant aid, and take out the most loans, they continue to have the largest amount of unmet financial need (Figure 1.4 and Table 1.3).

8. For students that have need, what is the average amount of unmet financial need?

Over the past five years, unmet financial need increased for students with need in all income levels. For example, the unmet need of students with income between \$40k and \$60k increased from \$9,729 to 11,157 and the unmet need of students with income greater than \$100k increased from \$0 to \$1,637 (Figure 1.5 and Table 1.5).

9. Can families afford to pay the expected family contribution?

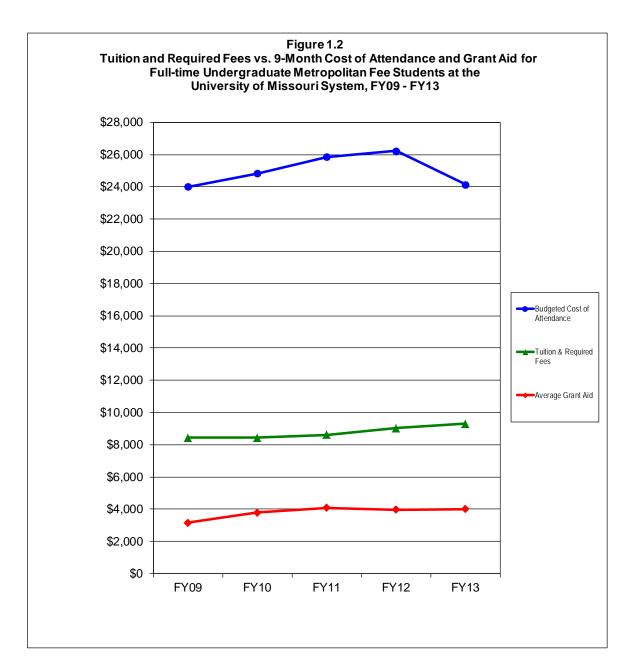

On average, nearly all families borrow a portion of the amount that it is expected to pay out-of-pocket (i.e. the expected family contribution). However, higher income students borrow a significant amount of the money that the family is expected to pay out-of-pocket. For example, in FY13 families with income between \$80k and \$100k borrowed nearly 16% of the expected family contribution (Table 1.5).
