University of Missouri System Undergraduate Financial Aid Summary Report FY2009-FY2013

(Non-Resident Undergraduates)

Executive Summary

The *Undergraduate Financial Aid Summary Report* includes undergraduate financial aid distribution patterns for the University of Missouri System and the four campuses from fiscal year 2008-09 (FY09) through fiscal year 2012-13 (FY13). In the first part of this report nine questions are addressed at the UM System level:

- 1. How many students received aid and what type of aid was received?
- 2. Has grant aid kept pace with increases in tuition and required fees?
- 3. How has the distribution of institutional gift aid changed over the past five years?
- 4. How has the distribution of PLUS loans changed over the past five years?
- 5. What percent of tuition and required fees is met by grant aid?
- 6. How has the number of aid recipients with need changed by income level?
- 7. How do financial aid packages vary by income level?
- 8. For students that have need, what is the average amount of unmet financial need?
- 9. Can families afford to pay the expected family contribution?

System-wide trends highlighted include:

- Total aid to non-resident students with need is awarded from a combination of aid based on merit and aid based on need. Over the past five years, there has been an 84.2% increase in the number of non-resident financial aid recipients that have financial need. There is no question that there are many more students with need due to the 52.4% increase in the enrollment of non-resident, full-time, degree-seeking students over the past five years (Figure 1.1). However, an equally significant reason for the increase in students with need is the fact that tuition and required fees have increased 17.3% and the overall cost to attend the University has increased 13.6% during the same time period (Figure 1.2). In other words, many students that otherwise would not have had a financial need became needy.
- There is an increasing gap between tuition and required fees and the average grant aid awarded to non-resident undergraduates over the past five years (Figure 1.2).
- The number of institutional grants awarded based on need increased from 504 in FY09 to 616 in FY13 (Table 1.1).
- Missouri non-resident undergraduate students in the lower income categories have the highest grant aid as a percentage of tuition and required fees (Table 1.2).
- The volume of Parent Loans for Undergraduate Students (PLUS loans) increased from FY09 to FY13 for both non-resident students with and without financial

need. In FY09, 695 parents borrowed an average \$13,600 to meet their child's education expenses. Five years later, 1,135 parents borrowed approximately \$18,113 to cover these expenses. System-wide, the amount of PLUS loans distributed to non-resident undergraduates increased from \$9.5 million in FY09 to \$20.6 million in FY13 (Table 1.4).

- Students with incomes less than \$40,000 tend to have the highest amount of financial need and receive larger total financial aid awards than higher income students. However, lower income students continue to have the largest amount of unmet financial need (Figure 1.4).
- The unmet financial need of non-resident students increased in all income levels over the past five years (Figure 1.5).

The contextual basis of financial aid distribution

Roughly 30% of non-resident undergraduates attending the University of Missouri pay the entire cost of attendance out-of-pocket. The majority of non-resident students receive some type of financial assistance to attend the University in the form of grants, scholarships, work study or loans. In addition, financial assistance comes from a wide variety of sources including the state and federal governments, profit and non-profit organizations, and the University (institutional gift aid). In addition, a significant amount of financial aid that is distributed is based on financial need (i.e. it is documented that the student's family cannot afford the entire cost of attendance). A student must complete a Free Application for Federal Student Aid (FAFSA) in order to determine the extent of financial need and the type and amount of aid based on need that can be awarded.

Many of the tables and figures throughout this report reference terms such as budgeted cost of attendance, financial need, grant aid, and unmet need. Assuming that a student has completed a FAFSA, Figure A.1 is provided to give an overview of how a student's financial aid package is determined.

Figure A.1
Example of How Financial Need is Determined and Aid is Distributed

\$35,013	Budgeted Cost of Attendance	includes tuition & required fees, books, and living expenses
(5,186)	Less: Expected Family Contrib	pution
29,827	Financial Need	
(6,917) 22,910		es need and non-need based grant aid from federal, state, ional, and other sources
(221)	Less: College Work Study	
(3,661)	Less: Need-Based Loans	
(3,676)	Less: Non-Need Based Loans	
\$15,353	Unmet Need	

Foremost, a BUDGETED COST OF ATTENDANCE (COA) is determined for every student that completes a FAFSA. The COA varies by student and is based on factors such as residency status, load status (full or part-time), and living arrangements (on or off-campus). Next the amount that the family is expected to contribute to cover the COA is determined based on several factors, including the family's adjusted gross income. A student's financial need is determined by subtracting the EXPECTED FAMILY CONTRIBUTION from the budgeted COA. If the calculated value of FINANCIAL NEED is positive, the student is eligible to receive need-based assistance such as Pell grants, college work study and need based loans. A student's REMAINING NEED is determined after subtracting GRANT AID (aid that does not have to be repaid) from the FINANCIAL NEED. After subtracting the remaining sources of financial aid (i.e. work study, need-based loans, and alternative loans), an UNMET NEED value is determined, which is the remaining amount of money a student needs to meet the COA after all financial assistance has been provided.

Caveats

Although Figure A.1 provides a good example of how financial aid packages are determined for students, a few caveats are worth mentioning:

- 1. The unmet need value is based on all of the financial aid that a student ACCEPTED which does not always equal the amount of aid a student was OFFERED. For example, a student might decline a need-based loan or alternative loan which would have covered the student's remaining cost of attendance. That student would have unmet financial need even though ample aid was offered to meet the budgeted COA.
- 2. A student's financial need might change during the academic year based on changes to the student's budgeted COA. For example, a student might live on-campus the first semester and decide to live off-campus the next semester.
- 3. Many students take part-time jobs to meet the COA. However, the compensation received from part-time jobs (other than college work study) is not documented and does not count towards meeting the COA. In essence, many students work to meet the COA and for these students the true unmet need is unknown.
- 4. Many families borrow the "expected family contribution" and the amount borrowed is not factored into the total financial aid package, i.e. it is not counted as financial aid. Therefore, in many cases, the true financial need of a student is underestimated.

Section I

System-wide Financial Aid Trends of Full-Time, Degree-Seeking Non-Resident Undergraduates from FY09 to FY13

PLEASE NOTE: The findings below highlight system-wide trends at the University of Missouri.

1. How many non-resident students received aid and what type of aid was received?

The total number of full-time, degree-seeking non-resident undergraduates steadily increased over the past five years from 5,014 to 7,639, an increase of over 52%. With this increase in enrollment, there has been an 84.2% increase in the number with financial need from 1,650 in FY09 to 3,040 in FY13 (Figure 1.1).

2. Has grant aid kept pace with increases in tuition and required fees?

Over the past five years tuition and required fees increased 17.3% and the budgeted cost of attendance increased 13.6% while average grant aid decreased 3.5%. The overall trend is that there is an increasing gap between tuition and required fees and the average grant aid awarded to non-resident undergraduates (Figure 1.2).

3. How has the distribution of institutional gift aid changed over the past five years?

The number of non-resident undergraduates with need that received institutional gift aid significantly increased and the average amount of the institutional gift awards slightly decreased. In FY09 there were 1,666 institutional grants awarded to students with need. The average award was \$5,014. In FY13 there were 2,709 institutional grants awarded to students with need and the average amount awarded was \$4,965 (Table 1.1).

4. How has the distribution of PLUS loans changed over the past five years?

The volume of Parent Loans for Undergraduate Students (PLUS loans) increased from FY09 to FY13 for both students with and without financial need. In FY09 695 parents borrowed on average \$13,600 to meet their child's education expenses. Five years later, nearly 1,135 parents borrowed approximately \$18,113 to cover these expenses (Table 1.4).

5. What percent of tuition and required fees is met by grant aid?

Lower income non-residents have the most financial need and on average receive much more grant aid than higher income students. In FY09, grant aid covered nearly 50% of tuition and required fees for students with income less than \$20,000 and 45% for students with income between \$20,000 and \$40,000. By FY13, grant aid covered 44% of tuition and required fees for students with income less than \$20,000 and 38% for students with

income between \$20,000 and \$40,000. With the exception of students with family income between \$60K to \$80K, grant aid continues to cover a smaller percentage of the tuition and required fees (Table 1.2).

6. How has the number of non-resident aid recipients with need changed by income level?

Over the past five years the University experienced an increase in the number of non-resident undergraduate students that required financial assistance at all income levels (Figure 1.3).

7. How do financial aid packages vary by income level?

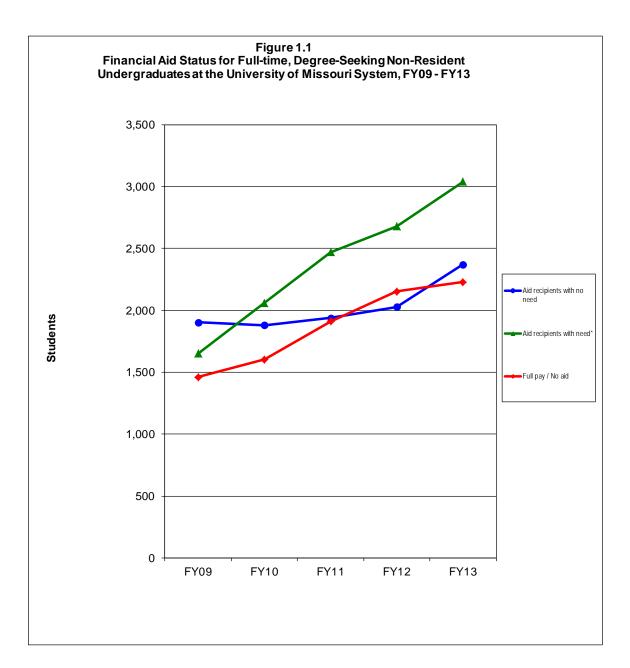

By income level, there is a difference in the structure of the financial aid packages and the way that financial need is met. For example, loans cover a larger percent cost of attendance for lower income non-resident students than higher income students. Also, even though lower-income students receive the most grant aid, and take out the most loans, they continue to have the largest amount of unmet financial need (Figure 1.4 and Table 1.3).

8. For non-resident students that have need, what is the average amount of unmet financial need?

Over the past five years, unmet financial need increased for non-resident students with need in all income levels. In FY13 the average amount of unmet financial need ranged from \$3,666 for students with family income greater than \$100K to \$16,253 for students with family income less than \$20K.

9. Can families afford to pay the expected family contribution?

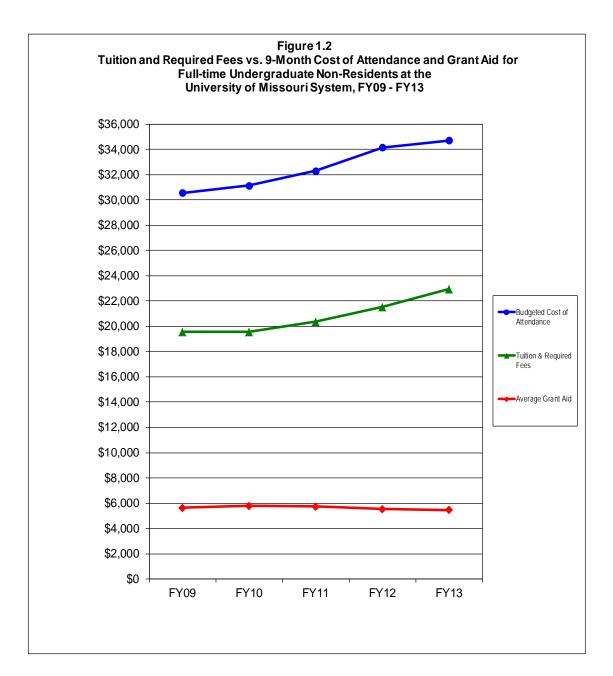

On average, nearly all families borrow a portion of the amount that it is expected to pay out-of-pocket (i.e. the expected family contribution). However, families with higher incomes borrow a larger percentage of what they are expected to pay. For example, in FY13 students with family income greater than \$100K borrowed approximately 23% of the expected family contribution (Table 1.5).
