Screen Entry	The average amount of this type of aid awarded to Group 2 students is outside the expected range of between 4,918 and 7,376 when compared with the prior year value. Please check the number of students and the total amount of aid awarded to these students, and correct or explain the discrepant values. (Error #7147)	Explanation	Yes	
Reason:	We cannot positively identify a cause for this scenario. However, we have seen decreased borrowing in the form of PLUS loans over the last few years at the same time there has been an increase in alternative loan borrowing. This indirect correlation is true for freshmen cohorts and for the undergraduate population at large.

Screen Entry	The calculated average amount of grant or scholarship aid awarded to Group 4 students from the federal government, state/local government, or the institution for this income level is smaller than expected in comparison with the other income levels. Please check the values reported for the number of these students who were awarded any Title IV aid (Col. 1) and the total amount of grant or scholarship aid awarded to them (Col. 3) and correct your data or explain the discrepancy. (Error #7317)	Explanation	Yes	
Reason:	The most significant difference in the aid awarded to students in 02b versus 02c is in the form of housing scholarships. More students in 02c qualified for and were offered housing scholarships than students in 02b. When we removed housing scholarships from the calculations, this anomaly disappears.			
Screen Entry	The total amount of grant or scholarship aid awarded to Group 4 students from the federal government, state/local government, or the institution across all income levels is outside the expected range of between 1,471,343 and 2,452,237 based on the prior year value. Please correct your data or explain. (Error #7332)	Explanation	Yes	
Reason:	Increase in merit scholarship eligibility, increase in housing scholarships and need-based grant, addition of Gear Up and Opportunity Scholars Program full scholarships.
