Enrollment Projections Report, 2001 University of Missouri System Office of Planning & Budget

Rationale for Revised Report

The original *Enrollment Projections Report*, 2001 was published in March 2001. However, the enrollment projections provided by the Rolla campus have since been revised. Compared to the original report, only Table 1, and the tables and text for the Rolla campus and the System are affected by this revision.

Executive Summary

The *Enrollment Projections Report*, 2001 includes University of Missouri enrollment projections for each of the four campuses and the System. Organized according to student level, it provides headcount and credit hour projections for the next five years. Each campus made headcount and credit hour projections and these projections are presented in this report unaltered. The totals for the UM System were calculated by adding totals from each of the four UM campuses. A special thanks to the following representatives who provided the enrollment projections for their campus: Rob. Taylor at UM-Columbia, Jennifer Spielvogel at UM-Kansas City, Carol Heddinghaus at UM-Rolla, and Mimi LaMarca at UM-St. Louis.

The highlights of the report include:

- Full-time, first-time freshmen enrollment is projected to increase 10% over the next five years. All four campuses expect increases, from 5% at Columbia to 15%, 20%, and 27% at St. Louis, Kansas City, and Rolla, respectively.
- System-wide, undergraduate headcount is expected to increase from 37,075 in fall of 2000 to 41,334 in the fall of 2005, an increase of 11%.
- Graduate headcount is expected to increase overall by 6%. An increase in graduate enrollment is
 expected at all campuses. The Columbia campus expects a 2% increase. Both the Kansas City and St.
 Louis campuses anticipate a 4% increase. The Rolla campus expects the greatest increase, with a
 projected 42% increase in graduate enrollment.
- Undergraduate on-campus, on-schedule credit hours across the System should see an 11% increase from approximately 461,124 credit hours in fall of 2000 to nearly 513,240 in the fall of 2005.
- Both the Columbia and St. Louis campuses expect that the percentage of resident and full-time students will remain unchanged over the next five years. The Kansas City campus predicts a 2% increase in the percentage of graduate students that are Missouri residents. However, the percentage of graduate students enrolled full-time is expected to decrease by 3%. The Rolla campus anticipates a 6% decrease in the percentage of graduate students that are Missouri residents. The percentage of full-time graduate students is expected to increase by 5%.

Organization of Report

The 2001 Enrollment Projections Report includes University of Missouri enrollment projections for each of the four campuses and the System. Organized according to student level, it provides headcount and credit hour projections for the next five years. Each campus made headcount and credit hour projections and these projections are presented in this report unaltered. The totals for the UM System were calculated by adding totals from each of the four UM campuses.

The text of this report refers to Tables 1-3 located in the body of the report. Please note, however, that more detailed information about the campus projections can be found in the appendix. Organized by campus, the tables in the appendix illustrate expected enrollment changes at the lower- and upper-division undergraduate levels, projections for each professional program (e.g., law, pharmacy, optometry, etc.), and enrollment forecasts at the graduate level. The appendix also includes more detailed information concerning the percentage of non-Missouri residents by level and the percentage of full-time students by level.

Considerations in Making Enrollment Projections

Making enrollment projections requires the careful consideration of several factors and influences that can affect future enrollments. For instance, depending on the campus, each of the following could influence enrollment: the effectiveness of an institution's recruiting and marketing strategy, shifts in the number of seniors graduating from high school, the economy, retention rates of students enrolled, and current tuition levels and anticipated increases. In addition, the competitiveness of other institutions vying for the same students, the availability of transfer students, changes in admission standards, new state policies or programs, and high school student interest in specific fields can all play a role.

There are two factors that continue to influence on-campus enrollment projections at the University of Missouri. Foremost, the various enrollment management approaches on each of the four campuses have significantly influenced enrollment projections for the next five years. For example, both of the urban campuses are working to improve recruiting efforts at the local community colleges in order to attract more transfer students. On the Columbia campus, the trend towards increased enrollments of first-time college students, its current admissions policies, the availability of financial aid, and the outlook for growing numbers of high school graduates are all important factors in projecting enrollment for the next five years. Significant growth in enrollment is expected at the Rolla campus, which has activity plans and degree programs in place to achieve the projected growth.

On-Campus Enrollment Projections

UM-Columbia

Enrollment is expected to increase at all levels on the Columbia campus. Total on-campus headcount is expected to increase 9% from 23,244 in 2000 to 25,230 in 2005 (Table 1). Professional-level enrollments are expected to remain unchanged and graduate enrollment is projected to increase by 2%. First-time degree-seeking freshmen enrollment is expected to increase by 5% from 4,174 in 2000 to 4,379 in 2005 (Table 2). The percentage of undergraduate Missouri residents and full-time students enrolled at UM-Columbia will remain steady over the next five years at 86% and 94 %, respectively (Table 3).

UM-Kansas City

The Kansas City campus expects an overall on-campus enrollment increase of 11% during the next five years. Much of this growth will occur at the undergraduate level, where an increase of nearly 17% is anticipated. Enrollment at both the professional and graduate levels is expected to increase by 4% over the next five years (Table 1). Some of the growth at the undergraduate level can be attributed to an expected increase in first-time freshmen: an increase of 20% by 2005 (Table 2). The percentage of undergraduate Missouri residents and full-time students are expected to decrease by 1% and 3%, respectively (Table 3).

UM-Rolla

Total enrollment on the Rolla campus is expected to increase by 27% over the next five years (Table 1). Undergraduate enrollment is expected to increase by 23%, with an expected 27% increase in the number of first-time freshmen (Table 2). The Rolla campus also anticipates a significant increase in the number of graduates students over the next five years. Graduate enrollment is expected to increase from 806 students in 2000 to 1,143 in 2005, an increase of 42%. At the undergraduate level, the Rolla campus expects to see an increase in the percentage of Missouri residents, from 77% to 79%, in the next five years. The percentage of full-time students is expected to remain relatively steady at 90% (Table 3).

UM-St Louis

Overall on-campus enrollment is projected to increase 5% over the next five years. By level, increases of 6% at the undergraduate level and 4% at the graduate level are expected. Enrollment in optometry, which is the only professional program at the St Louis campus, is expected to increase by 1% from the 2000 level (Table 1). The most significant gains expected on the St Louis campus are reflected in first-time freshmen projections. St Louis anticipates a 15% increase in first-time freshmen enrollment from 498 students in 2000 to 571 in 2005 (Table 2). In terms of the percentage of Missouri residents and the percentage of full-time students, the St Louis campus expects those percentages to remain largely unchanged over the next five-year period at 94% and 56%, respectively (Table 3).

UM System Total

Total on-campus enrollment for the UM-System is expected to grow 10% over the next five years from 50,225 in 2000 to 55,181 in 2005. Increases are expected during this period at the undergraduate, graduate, and professional levels of 11%, 6%, and 2%, respectively (Table 1). Interestingly, the Kansas City, Rolla, and St Louis campuses all expect at least double-digit percentage increases in first-time freshmen enrollment over the five-year period. Overall, first-time freshmen enrollment is expected to increase 10% (Table 2).

A special thanks to the campus representatives who were responsible for the enrollment projections on their campus: Rob. Taylor at Columbia, Jennifer Spielvogel at Kansas City, Carol Heddinghaus at Rolla, and Mimi La Marca at St Louis.

Please address any questions or concerns to La Shonda Boone, Assistant Analyst, Office of Institutional Research and Planning, 722 Lewis Hall, University of Missouri System, Columbia, MO 65211, 573-884-3104.

Definitions

Full-time equivalent (FTE) was calculated using the following definitions:

Undergraduate FTE = Total semester SCH/15 Graduate FTE = Total semester SCH/12

For First Professional, these University of Missouri definitions were used:

Dentistry FTE = Headcount

Law FTE = Total semester SCH/15 UMC Medicine FTE = Total semester SCH/18

UMKC Medicine FTE = Headcount
Optometry FTE = Headcount
Pharmacy FTE = Headcount

Vet Medicine FTE = Total semester SCH/16
